

## USER INTERFACE TEST CASES

### UA1-SO

The UI testing for our project is done featuring the core features of the *askit* website. These features are listed below:

- **Login/Sign Up** Registration procedure
- Question functionalities
  - **Ask** and/or **Answer** some questions
  - **Upvote** or **Downvote** a question
- Profile Settings
  - Add a **profile picture**
  - **Modify** an account's password
  - Change a **description** of an account

### 1. SIGN UP REGISTRATION PROCEDURE

To successfully create an account, the user needs to follow these requirements:

1. Enter a username of at least 4 characters.
2. Enter a password between 8 and 20 characters.
3. Choose both security questions and give answers to both.
4. Select a profession
5. Select a gender

#### 1.1. Creating a new account with wrong username

Error: Username is too short. Please enter a username with at least 4 characters.

1.2. Creating a new account with wrong password

Error: Invalid password length entered. It must be a minimum of 8 characters

1.3. Creating a new account without selecting question

1.6. Creating a new account without selecting a gender

Error: Invalid gender selected. Make sure it is part of the list

1.7. Creating a new account following the requirements

Redirected to login!

## 2. QUESTION FUNCTIONALITIES

To successfully create a question, a user needs to be connected, and then clicking on “New Question”.

2.1. Not Logged in

**The user does not have an option to add a question.**

2.2. Logged in

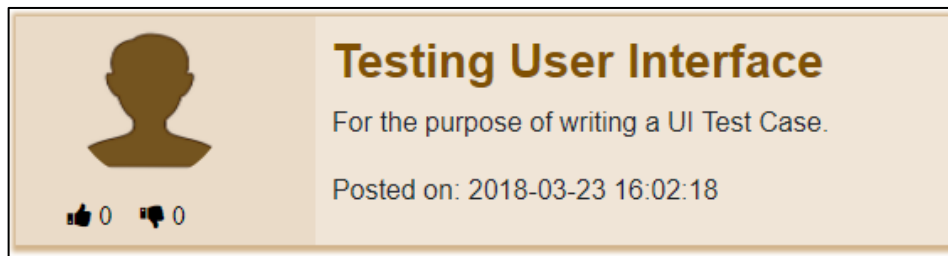

New Question

2.3. Text area appears, and question can be asked

The screenshot shows a form for creating a new question. At the top, there is a label 'Titile' (likely a typo for 'Title') next to an input field containing the placeholder text 'Title of your question'. Below this is a large, empty text area for the question body. Underneath the text area is a section labeled 'Tags :' with an input field containing the placeholder text 'Add a tag'. At the bottom left of the form is a blue button labeled 'Ask it!'.

2.4. *Ask it!* button posts the question online

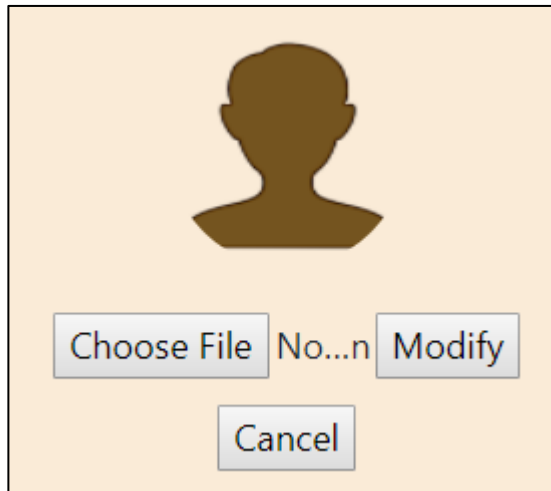

### 3. PROFILE FUNCTIONALITIES

#### 3.1. Changing profile Picture

**The user does not have an option to change picture.**

#### 3.2. Modify Password option modifies the actual password

#### 3.3. Adding a description modifies the bio of the user
